## ABOUT ME

---

Staff Engineer and Technical Project Manager with 7+ years building developer platforms, SDKs, APIs, and multi-chain infrastructure. I work across Engineering, Product, and Customers, from roadmap and RFCs to delivery, partner programs, docs, and DevRel. I like owning ambiguous problems end-to-end and turning complex technical systems into products people can actually use.

## EXPERIENCE

---

### Staff Engineer & Technical Project Manager

Remote

Webacy

Apr 2025 - Present

- Own roadmap and delivery for a multi-chain risk-scoring platform across 9 networks, aligning Engineering, Product, BD, and enterprise partners.
- Drove the org-wide labeling taxonomy RFC with 76 cross-team comments, improving how risk data is modeled, explained, and shipped.
- Shipped @webacy/sdk and the Mintlify docs platform, cutting partner integration time from days to hours.
- Led 6+ enterprise partner programs including Mercado Libre, SUI, 1inch, WalletConnect, Cetus, and Metamask; closed the Agio deal and spoke at DuneCon + DSS Security Summit.

### Senior Software Engineer & Product Lead

Remote

POAP

May 2021 - Apr 2025

- Led a new product line end-to-end, from roadmap and stakeholder alignment to delivery, improving onboarding efficiency by 40%.
- Shipped POAP.js, the public SDK that cut partner integration time by 50%.
- Drove the Freeze Token smart-contract upgrade, improving token-migration security by 30%.

### Full Stack Developer

Remote

Quipu Market

Apr 2020 - May 2021

- Built the front-end design system, shared component library, and CI/CD pipeline, accelerating dev velocity 30% and cutting deployment errors 40%.

### Full Stack Developer

Buenos Aires, Argentina

Turismocity

Oct 2019 - Apr 2020

- Integrated five external APIs, improving system response speed 20% and data consistency 25%.

## SKILLS

---

**Product & Program:** Roadmapping, RFCs, OKRs, Stakeholder Management, Partner Programs, Linear, Notion, Figma

**Engineering:** TypeScript, Node.js, NestJS, Next.js, React, Prisma, PostgreSQL, Redis

**Platform & DevEx:** SDK & API Design, OpenAPI 3.0, Mintlify, Technical Docs, DevRel, Datadog

**Cloud:** AWS ECS, SQS, SNS, Lambda, Docker, GitHub Actions, CI/CD

## EDUCATION

---

Instituto Tecnológico de Buenos Aires (ITBA), Buenos Aires, Argentina

Jul 2015 - Jul 2023

Software Engineering

Fachhochschule Technikum Wien, Vienna, Austria

Feb 2022 - Jul 2023

Master of Science in Engineering (MSc)
