ABOUT ME

Product engineer and startup builder with 7+ years taking products from ambiguous ideas to production. I own problems end-to-end across Engineering, Product, and Customers, from roadmap and RFCs to delivery, partner programs, docs, and DevRel, and I like shipping fast and iterating on real user feedback.

EXPERIENCE

Product Engineer *Remote*
Webacy *Apr 2025 - Present*

- Expanded risk scoring to 13 chains, now serving ~4M billable API calls a week to 50+ organizations, including leading wallets, DEX aggregators, and a top LatAm marketplace.
- Launched pay-per-call API access for AI agents (x402, USDC on Base, no API key) from spike to mainnet in three weeks, plus an AI risk assistant and a metered 7-tool MCP server.
- Shipped the stablecoin, RWA, and vault due-diligence product (A+ to F grades) and token-fraud detection that profiles launch developers across platforms (1,400+ profiled, 93 flagged for pump-and-dump).
- Shipped @webacy-xyz/sdk, @webacy-xyz/cli, and OpenAPI docs, cutting partner integration time from days to hours; built enterprise custom plans and self-serve billing.
- Led the labeling-system redesign through an org-wide RFC and moved label ingestion in-house, cutting third-party data queries ~98%.
- Spoke at DuneCon and the DeFi Security Summit, generating 12 qualified leads, and closed an enterprise deal end to end.

Senior Software Engineer *Remote*
POAP *May 2021 - Apr 2025*

- Led a new product line end-to-end, from roadmap and stakeholder alignment to delivery, improving onboarding efficiency by 40%.
- Co-built POAP.js, the public TypeScript SDK for POAP (third-largest contributor), cutting partner integration time by 50%.
- Drove the Freeze Token smart-contract upgrade, improving token-migration security by 30%.

Full Stack Developer *Buenos Aires, Argentina*
Quipu Market *Apr 2020 - May 2021*

- Built the front-end design system, shared component library, and CI/CD pipeline, accelerating dev velocity 30% and cutting deployment errors 40%.

Earlier Experience: Full Stack Developer at Turismocity (2019–2020) and Frontend Developer at Wolox (2018–2019): API integrations and client front ends in Vue.js, React, and Angular.

SKILLS

Product: 0→1 Development, Product Strategy, Roadmaps, RFCs, Developer Experience, DevRel

Engineering: TypeScript, React, Next.js, React Native, Node.js, NestJS, PostgreSQL, Redis, OpenAPI

AI & Platform: LLMs, MCP, Function Calling, AWS (ECS, Lambda, CDK), Cloudflare, Docker, Stripe, CI/CD

EDUCATION

Fachhochschule Technikum Wien, Vienna, Austria *2022 - 2023*
Master of Science in Engineering (MSc)

Instituto Tecnológico de Buenos Aires (ITBA), Buenos Aires, Argentina *2015 - 2023*
Software Engineering
